Expanded Production Facility to Open in Perry Industrial Park

Perry, Georgia & Jacksonville, Florida – October 12, 2007 –

Sy-Klone International is proud to announce its expansion into Middle Georgia, with the purchase of a building and property in the Perry Industrial Park for a new manufacturing facility. Sy-Klone plans to make a significant capital investment, up to \$7 million, and employ approximately 50 people over the next three years.

Sy-Klone International is a tier 1 supplier to the heavy equipment industry with its worldwide headquarters in Jacksonville, Florida. Sy-Klone's manufacturing processes are registered to ISO 9001:2000 quality standards and this new facility will allow Sy-Klone to pursue registration to the more comprehensive ISO/TS-16949 quality system. This new manufacturing facility affirms Sy-Klone's commitment to supply its expanding customer base and demonstrates

Sy-Klone's continued commitment to quality as the premier worldwide supplier of air cleaning products and technologies.

Sy-Klone manufactures patented air precleaners and sophisticated cab pressurization and HVAC filtration systems. Sy-Klone was the first manufacturer to produce plastic, injection molded atmospheric ejection precleaners with the introduction of the Series 9000 in 1990. Sy-Klone continues to be the recognized technological and innovative leader in the markets and industries it serves.

"We are very please that Sy-Klone International has chosen to partner with Middle Georgia in the expansion of their manufacturing capability," said Neal Rearden, Chairman of the Houston County Development Authority. "They are a solid company with a promising future and we are glad to be a part of it," Rearden added.

Registered to
ISO 9001:2000

"I am excited about them coming here, these are good people and we are going to be proud to have them here," said Larry Walker, retired 32 year veteran of the Georgia Legislature and board member of Security Bank in Perry.

Sy-Klone International chose the Perry area because of the hospitality they received, availability of quality manufacturing space in close proximity to I-75 and the work force found in Middle Georgia. "We could not be more pleased," said James Moredock, President of Sy-Klone. "The search for a new manufacturing location ultimately led us to the best choice, Houston County in Middle Georgia."

Sy-Klone International looks forward to the opening of its Middle Georgia manufacturing facility and becoming part of the this outstanding community.
